Sammendrag af JP 2001104350 (A)

PROBLEM TO BE SOLVED: To provide a hernia band being usable by most patients although of a limited size, being mass-producible so that it can be provided at a low cost, being nice to wear, and being effective in pressing protruding intestines.

SOLUTION: An abdomen band portion surrounding the abdomen and being locked by an engaging part and a locking part, and a crotch part fixed to the front or back of the abdomen band portion at one end and causing the engaging part provided at the other end to lock the locking part provided on the abdomen band portion, are made of stretchable materials such as woven fabrics.
